ABOUT ME

I am a professional with over a decade's experience in sales and operations management. Renowned for meticulous attention to detail and a passion for crafting innovative user experiences through code that tells a story. As a dedicated full-stack developer, I ensure project completion with unwavering commitment to quality control and meeting project deadlines. Embracing new learning challenges whenever I can and supporting others in achieving their goals are integral aspects of my approach.

EXPERIENCE WORK

SPORTS THERAPIST

2001-2010 - SELF EMPLOYED

A client base of elite South African athletes, driving a consistent 22% year-on-year revenue growth through strategic implementation of social and marketing initiatives.

MERLIN SECURITY

2011-2014 - SALES MANAGER

I led a sales team of 15 people, achieving a remarkable 50% increase in company turnover within the first year. I was Instrumental in the requirement and establishment of a second and third branch for the company in newly secured areas.

MERLIN SECURITY

2015-2021 - OPS MANAGER

Promoted to Operations Manager overseeing a team of 350 personnel, entrusted with the comprehensive management of daily company operations. Responsibilities included client relations, HR compliance, inventory oversight, contract management, as well as spearheading marketing and campaign strategies.

MENTAL HEALTH

2021-2022 - SADAG

Qualified as a (ASCHP) counselor and worked with the South African Depression and Anxiety Group, handling callers with various mental and emotional health issues, including suicidal tendencies.

SOFTWARE DEVELOPMENT PROJECTS

2023-CURRENT - MELSOFT ACADEMY

- Worked as part of a team effort focusing on Object-Oriented Programming principles and ES6 to develop an innovative online ticket booking system. The project aimed at catering to the business and startup community, facilitating bookings for a wide range of events, including both paid and free engagements.
- Engineered an immersive blog platform leveraging React to deliver a seamless user interface and experience. Implemented Express for efficient route management and utilized MySQL for robust user authentication, content management including posts, comments, and user interactions.
- Designed and developed a user-friendly chatbot utilizing the OpenAI API. Crafted an elegant and responsive frontend interface for seamless user interaction. The chatbot allows users to engage with an AI-powered system generating responses based on their inputs, enhancing the conversational experience.
- Led a collaborative team project to develop a robust web application centered around cryptocurrency market trends, particularly emphasizing Bitcoin's performance. Created a visually captivating dashboard interface allowing users to interact with real-time cryptocurrency data via an API. Implemented user authentication and data storage using MySQL, ensuring a secure and personalized experience for users engaging with the application.
